

GUTTEREEL™

CURB INLET FILTER

REMOVES SEDIMENT, TRASH AND DEBRIS FROM STORMWATER RUNOFF

GuterEEL™ is a highly effective curb inlet sediment control filter used to remove suspended soils, trash and debris from stormwater runoff. It is designed with a built-in overflow weir to prevent ponding during heavy storm events.

The weight of the unit holds it firmly in place close to the curb face, and its durability allows the unit to be cleaned easily and reused from job to job. The unit is available in 6' and 9' lengths.

The GuterEEL filter sleeve is composed of 100% shredded, recycled tire rubber.

ADVANTAGES

- Designed with high-flow overflow weir for extreme wet weather events
- High-flow/high-strength outer filter
- Easy to install, use and reuse
- Filter media composed of 100% recycled, shredded tires
- Weight of unit holds it securely to curb surface
