

Annual Ryegrass

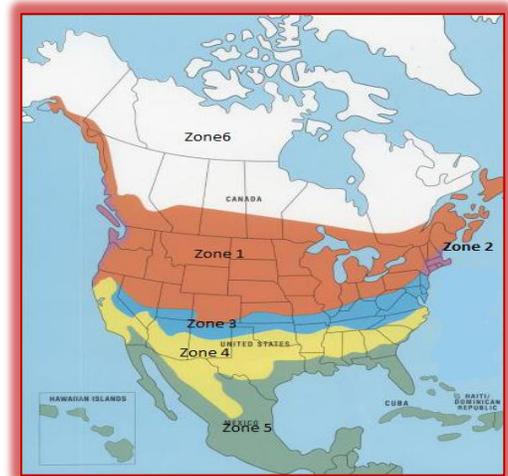

(Lolium perenne ssp. multiflorum)

Varieties: Gulf

Annual Ryegrass is used for erosion control and other applications requiring quick, economical ground cover. Annual Ryegrass has an aggressive root system, which establishes quickly in poor and compacted soils. It is often used as a temporary “nurse” grass while permanent grass is being established. For longer-term use, re-seeding needs to be done annually. It can be found at elevations up to 9,500 ft.

- **LIFE SPAN:**
 - Annual
- **SEASON:**
 - Cool
- **LEAF TEXTURE**
 - Rolled in the bud, long, narrow
- **GROWTH HABIT**
 - Bunch grass
- **RECOMMENDED USE**
 - Lawns, pastures

Zone: All
Seeding Rate
6 - 8 lbs. per 1000 square feet
Seeds per lb.: 227,000
Germination Time
5-7 days
