STORMTROUGH FILTER FOR OPEN CURB INLETS

CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

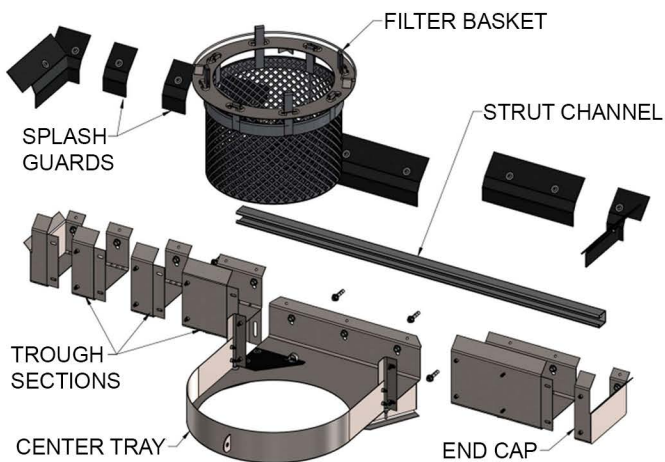

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the StormTrough open curb inlet filter.

The StormTrough Filter is a **robust product** designed with durability and **ease of installation and maintenance** in mind. Comprised of **fewer components which are modular and prefabricated** and can be retrofitted for curb inlets with wings and of any length. Allows for quick and easy assembly compared to alternative products. This revolutionary design features an 18 gauge stainless steel trough along the curb wall, positioned to capture trash and debris effectively before transporting it to a **removeable filter basket** comprised of either 14 gauge perforated stainless steel or lightweight polypropylene. The filter basket is strategically placed directly below the manhole, creating a seamless process for cleaning and maintenance, simplifying the overall stormwater management process.

Get more of what you want with more customizable options than the alternatives. Baskets come in varying depths to accommodate catch basin irregularities and maximize the space available thus **reducing maintenance intervals**. Stainless steel basket reinforced with a stainless steel support leg. **Quickly maintain by hand or vacuum truck.** **ALL filter components** are backed by a **10 year warranty** which greatly exceeds the industry standard.

Performance matters. The StormTrough trough with back wall weir design **minimizes clogging and over topping of floatable trash**. Designed to accommodate large floatable trash like water bottles without allowing them to become dislodged. The angled back-splash flange **redirects and prevents water and trash from overtopping during high-flow rain events**. Seepage holes are approximately 4.8mm to ensure no standing water remains in the trough. Through discussion with the CA State Waterboard, testing was conducted on the effectiveness of the StormTrough using the 10 year 1 hour storm event testing criteria.

Contact your local Ferguson representative for help with proper product selection and design options, including custom flow rates to meet customer specifications and for reduced maintenance.

CPS - L AND U WITH QUICK RELEASE AND VECTOR PORT CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the Connector Pipe Screen in both “L” and “U” configurations. **Available for 12, 18, 24, 36 inch pipes and larger custom sizes.**

The quick release mechanism allows for **easy install and removal for maintenance without the need for confined space entry.**

CPS U Configuration

CPS L Configuration

A Connector Pipe Screen (CPS) is a catch basin insert trash capture filter device. Unlike other catch basin inserts that are typically installed closer to the inlet (under the drain grate or below the curb opening), CPS inserts are installed in front of the catch basin's outlet pipe – **trapping trash and debris inside the catch basin while allowing filtered stormwater to exit into the storm drain infrastructure.**

The CPS is designed to cover a specific pipe diameter – its size does not depend on the size of the catch basin drain. The CPS is a **compact, affordable product that is easy to install and adaptable over a wide range of catch basin sizes and styles.** The design utilizes very little space, maximizes the trash storage capacity within the catch basin and allows for easy maintenance.

STORMRING CONNECTOR PIPE SCREEN

CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the StormRing CPS. Available for **6, 8, 10, 12, 15, 18 inch pipes, and larger custom sizes**

The expanding ring **goes into the outlet pipe opening**, and allows you to torque a bolt until the ring is tightly secured onto the pipe. Then the back plate can be installed onto the expanding ring and the front cover be placed on and secured with two thumb screws. The expanding ring **requires no power tools or drilling of existing structures, making installation and maintenance easy.**

STORMSACK FILTER FOR GRATE AND CURB INLETS OR MANHOLES

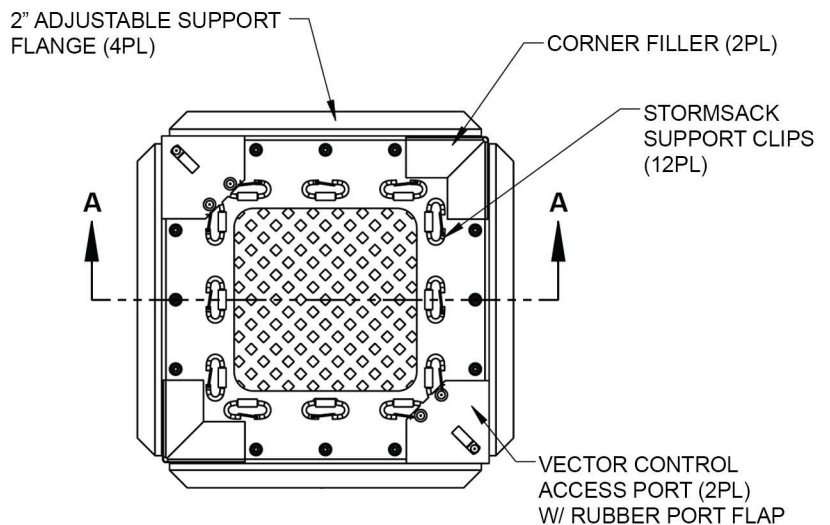

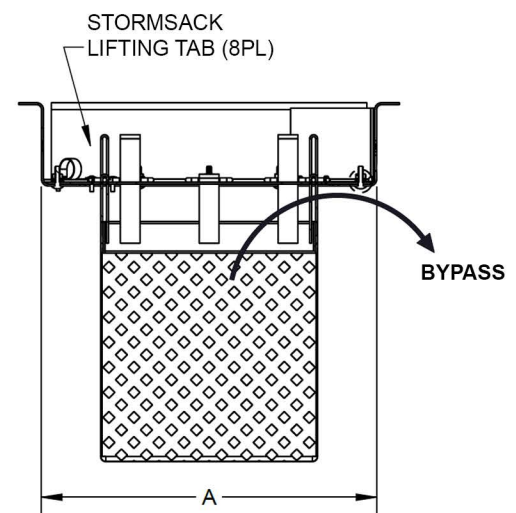

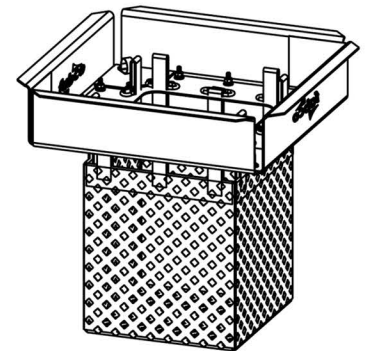

CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the StormSack BMP and PLUS.

The StormSack Filter is a **robust product** designed with **fewer components** and the ease of installation and maintenance in mind.

- Simply rest the **durable 13 gauge stainless steel frame** on the grate lip and easily adjust the **expandable and customizable flanges** in the field to accommodate catch basin irregularities.
- Get more of what you want with **more customizable options** than the alternatives. The **flexible lightweight polypropylene basket** comes in **varying depths** and has been **designed to maximize the space of the catch basin opening** thus **reducing maintenance intervals**.
- **Stainless steel basket** option available with **Fabco's StormBasket model** which can also be configured for most any catch basin drain configuration.
- **Alternate flange configurations** available as well as **custom flow rates** to meet customer specifications and for reduced maintenance.
- **Quickly maintain by hand or vacuum truck.**
- **ALL filter components** are backed by a **10 year warranty** which greatly exceeds the industry standard.
- Contact your local Ferguson representative for help with proper product selection and design options.

READY-FIT STORMSACK FILTER FOR GRATE AND CURB INLETS

CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

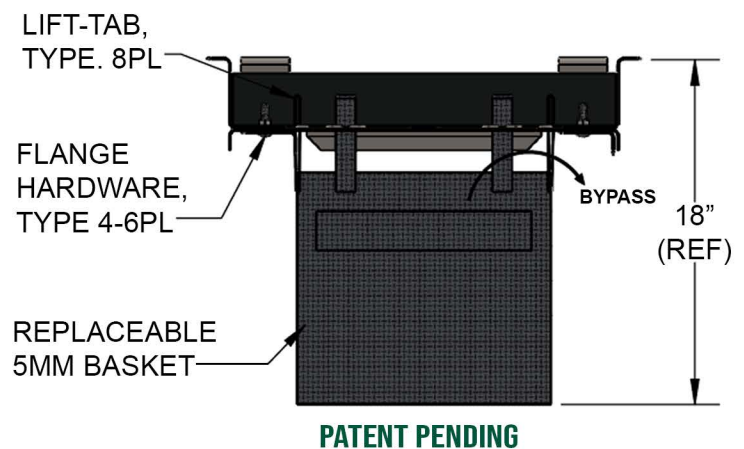

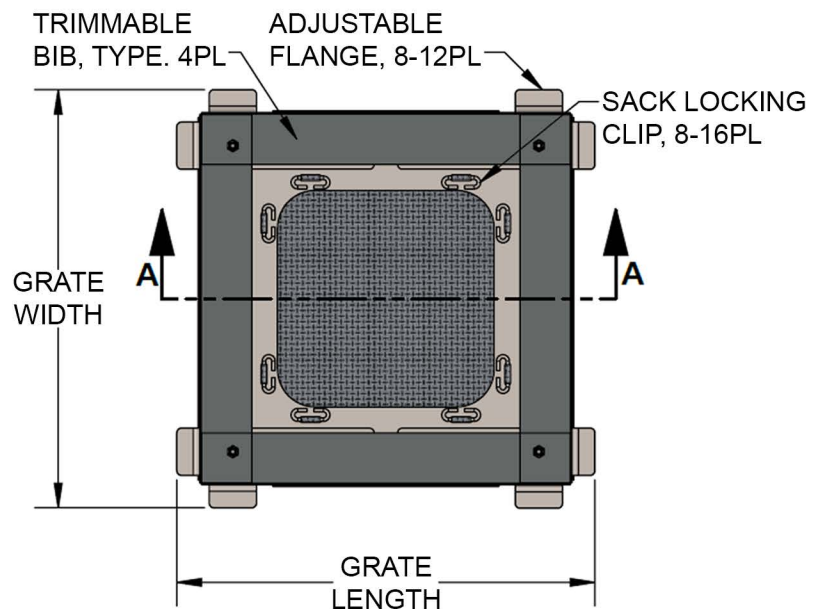

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the Ready-Fit Stormsack - a line of **5mm HDPE basket filters** that **each provide a full 12-inches of adjustability in each direction** to allow the install team the **flexibility to dodge most drain protrusions and irregularities by simply adjusting the flanges** right on the jobsite. **No special tools are needed** to make these quick adjustments. Bottomline, just provide us with the grate size, and we'll provide you with the proper Ready-Fit solution. It's that easy!

PRODUCT NOTES

- 1) Stainless Steel Frame & Hardware
- 2) Recommended 2" Min. Clearance Below Sack
- 3) Custom Sizes Available
- 4) 40 US Sieve Geotextile Options Available
- 5) Standard Basket Depth is 18". Also available in 12" and 24" depths and custom depths.

AVAILABLE ADD-ONS

- 1) Oil Boom
- 2) HDPE Mesh Liner
- 3) Protected Bypass Hood
- 4) CA Waterboard Vector Control Port

STORMBASIN CARTRIDGE BASED FILTER

CERTIFIED FULL TRASH CAPTURE DEVICE BY CA STATE WATER BOARD

With over **25 years of experience**, Fabco Industries continues to offer and expand upon their comprehensive line of versatile solutions to include an array of **CA SWRCB approved devices**, including the StormBasin cartridge based inlet filter.

The Fabco Industries StormBasin is a **cartridge based inlet filtration device** designed to **remove and/or neutralize pollutants commonly found in stormwater**. It's a permanent device that can be configured for **grate or curb inlets and manholes** and retrofitted to **accommodate various inlet sizes**, available in the **BMP series** and **PLUS series**, with the **PLUS** featuring a protected bypass.

The cartridge filters are **easy to remove and replace**, and Fabco produces several types of cartridges to handle an array of pollutants – including but not limited to: **sediment, trash & debris, nutrients, coliform bacteria, hydrocarbons (oils & grease), and heavy metals**.

Recommended to replace every 12 months.

Contact your local Ferguson representative for help with proper product selection and design options, including custom flow rates to meet customer specifications and for reduced maintenance.
