THE FUTURE OF PIPE REPLACEMENT PLANNING IS HERE— RISK-FREE.

We're excited to offer access to the next generation of pipe replacement planning—**a cutting-edge solution that uses artificial intelligence (AI) and machine learning to provide an inside look at your utility's infrastructure.**

VODA.ai understands that utilities want assurance before they commit their limited funds. VODA.ai's performance guarantee allows utilities to measure the software's performance, understand how they can use the results and end the financial commitment if it doesn't deliver the value promised—no risk, just results.

STRENGTHEN YOUR INFRASTRUCTURE WITH OUR INTUITIVE PIPE SERVICE

HOW IT WORKS

- We'll work with you to gather and import relevant data. Don't have it? That's fine, we'll help you get it.

- That data is then plugged into our system, which uses machine learning to fill gaps and provide accurate results.

- AI studies your data to yield detailed visual reports that help optimize pipe lifespan and prevent major breaks before they happen.

HOW IT HELPS

- This unique service is 3x more effective than traditional break models.

- Municipalities that utilize this service see a 50% reduction in large breaks.

- Customers realize estimated cost savings of up to $5 million.
