

FloPath.cloud

a MOBILTEX brand

WEB-BASED PLATFORM:

POWERFUL VISUALIZATION AND CONTROL – IN ONE COMPLETE INTERFACE

FloPath.Cloud delivers powerful, secure two-way communication capabilities, data storage and reporting for the entire range of MOBILTEX FloPath remote pressure & flow monitoring devices.

- INTUITIVE INTERFACE DESIGNED FOR EASE-OF-USE**

The FloPath.Cloud platform is designed for simplicity. Its thoughtfully engineered UI enables key personnel to quickly and easily access the data repository, reporting functions and remote data logger controls with virtually no training.

- ACCESS ANYWHERE, WITH ANY WEB-ENABLED DEVICE**

All data that is transmitted from the PFM1 device series is stored in the secure FloPath multi-tenant global database and can be accessed from any location, providing users instant, comprehensive access to all performance data and activities.

- CREATE DETAILED REPORTS, GRAPHS AND MAPS**

Technicians and managers can easily view and download pressure/flow data, compare data from multiple sites side-by-side and export reports. FloPath.Cloud also displays easy-to-read maps that provide near real-time display of system status so technicians can see where FloPath devices are operating normally, or experiencing alarm conditions.

- REMOTELY CONTROL AND UPDATE IN-FIELD DEVICES**

FloPath.Cloud's robust cellular communication capabilities enable two-way communication with all PFM1 series devices to remotely modify device configurations and eliminate the need for time-consuming manual configuration changes.

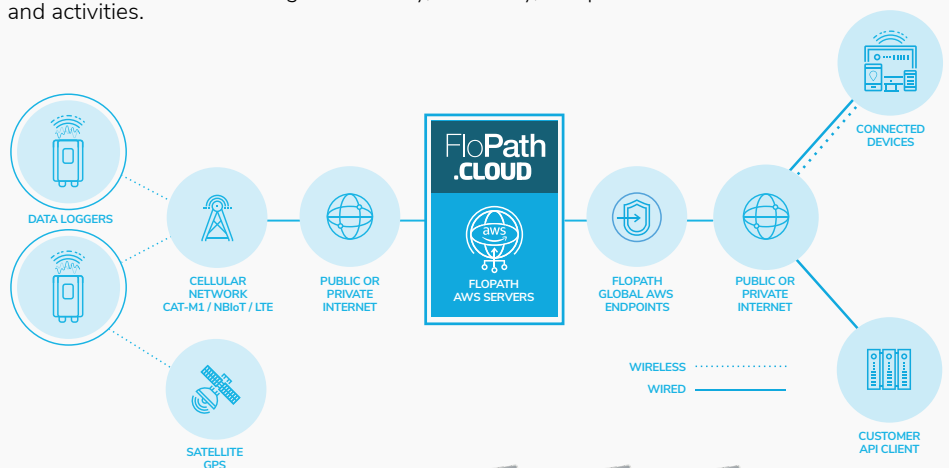

- NO I.T. OVERHEAD**

The FloPath.Cloud web-based platform is entirely engineered and supported directly by MOBILTEX with automatic updates and enhancements - no updates ever required! AWS [Amazon Web Services] ensures enterprise grade security, scalability, and performance.

CLOUD ACCESS

- 1 DATA ACQUISITION, SECURITY & CONTROL**
- 2 VISUALIZATION & ANALYSIS**
- 3 REPORTING, ALARMS & COLLABORATION**

PFM1 SERIES COMPATIBLE

1 DATA ACQUISITION, SECURITY & CONTROL

The FloPath.Cloud Platform is the connected backbone to our field devices, with industrial-grade communication networks, security, and data management with global connectivity via LTE, CAT-M1 & NBLoT cellular backhauled.

- Access with any web-enabled device – fully responsive browser interface for mobile applications
- Open API fully integrates data-sets with wide range of third-party systems
- Intuitive Interface thoughtfully engineered for ease-of-use
- Group assets by location/technician to better coordinate field activities
- Two-way communications with all remote devices
- Three years of measurement data automatically archived
- Global network via multiple cellular protocols
- MOBILTEX developed – automatic upgrades, no IT req'd
- AICPA SOC2 Data Security and Operations Certified
- Secure cloud servers with full redundancy and failover
- Limitless scalability via Amazon Web Services (AWS)

2 VISUALIZATION & ANALYSIS

FloPath.Cloud collects, normalizes, analyzes and integrates in near real-time field data from the entire PFM1 series of devices to provide a pressure, transient pressure & flow data profile across your entire organization within one powerful solution.

- Display and trend graphing of pressure/flow rates
- Proprietary transient pressure display easily highlights surge events
- Graphically displays Site Locations - precise GPS location
- Google Maps® engine delivers geographical accuracy
- Advanced functions for data visualization & prioritization
- Open API integrates data-sets with wide range of systems
- Trending and Predictive Logic capabilities [2026]

3 REPORTING, ALARMS & COLLABORATION

Field technicians and engineering teams can leverage a suite of powerful tools — immediately feed valuable pressure or flow data to any cloud or enterprise application via data exports or secure Open API to achieve a complete operational picture.

- Multiple user accounts + configurable permission levels
- Open API integrates data-sets with wide range of systems
- Efficient data logger fleet management ensures asset uptime and regular data collection
- Simple data download exports [Excel/CSV] for 3rd party management software
- Alarms programmed to specified performance measurements
- Configurable SMS & email call list for alarm conditions
- Ability to remote change data logger configurations and control set points
- Alert thresholds for scheduled comms deviations
- Proactive color-coded warnings and alerts including low battery and site status
- Configurable dashboard summarizing system status helps prioritize CP activities [2026]
- Easily export detailed system performance reports
