

STORMRING CPS - GROSS SEDIMENT REMOVAL DEVICE

PREVENTS TRASH AND DEBRIS FROM DISCHARGING THROUGH STORM STRUCTURE OUTLET PIPES

The Stormring CPS is designed to cover a specific pipe diameter by mounting to the inside wall of the outlet pipe. The CPS is a compact affordable product that is easy to install and adaptable over a wide range of catch basin sizes and styles. The design utilizes an expandable ring to mount to the inside of the outlet pipe, with a plate and screen being attached to the expanded ring. This utilizes little space, maximizes the trash storage capacity within the catch basin and allows for easy maintenance.

STANDARD FEATURES

- Manufactured from perforated aluminum.
- Performance characteristics:
 - Flow rate: the apparent open area of the slotted or perforated screen is larger than or equal to the cross-sectional area of the outlet pipe.
 - Bypass: the open area of the bypass is equal to the cross-sectional area of the outlet pipe.
- Standard sizes available from 6" to 24"
